

Markdown app

1. Introduction

The idea of this app is to create article or take note with clean layout like render!

2. User Interface Design and Prototype

Is like a book, i wanted take note and can be most productive for article for example

3. Navigation Structure

This app is SPA with only two box . in the left : write with markdown and the right the result

4. Références

i can see that here : <https://www.oberlo.com/blog/markdown-editors> and i think is the little good project for begin
